## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2, 4-6 and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hird et al. (Liquid crystals, 1993, Vol. 14, No. 3, pages 741-761).

The reference discloses a novel compounds represented by formulae in Tables 1 and 2, which read on the claimed formula (II). Also, see the preparation of the claimed formula (II) in Schemes 2-6 from page 743 to page 745. The reference anticipates the claimed invention.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 11-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hird et al as applied to claims 2, 4-6 and 9-10 above, and further in view of Hanna et al. (US 5,766,510).

Hird differs from the claims in that the claims are devices. The compounds of Hird's have charge transport properties, which are useful for various applications such as photosensors, electroluminescence devices, photoconductors, space modulating devices, and thin film transistors (see col. 7, lines 48-52 of US '510). Therefore, it would have been obvious to those skilled in the art to utilize the Hird compounds in the present display devices.

#### ***Response to Arguments***

5. Applicant's arguments with respect to claims 2, 4-6 and 8-22 have been considered but are moot in view of the new ground(s) of rejection. However, the rejections applied in the previous Office Action are overcome by the amendment filed on 5/23/2002.

#### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1756

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
